

# ElectronicSchoolBoard®

Financial and IT Leaders

## Do you have the right stuff for efficient meetings?

From regular public board meetings to closed executive session, keeping everything running smoothly is a huge job. Does your district have the tools it needs to prepare for meetings and make them run as efficiently as possible? ElectronicSchoolBoard® can help you save time, money and even the environment. We are the most comprehensive, fully-automated paperless meeting solution in the marketplace today. We have what you need to get the job done, and get it done fast.

### You are the chief financial or business officer...

Resources are tight, and throughout your district you are asking your team to “do more with less.” Your goal is to keep things running successfully, but with an eye on the bottom line. ElectronicSchoolBoard® will help your central office work more efficiently. We can help cut down meeting preparation time by as much as 50%. No other solution comes close to the speed and efficiencies of the ElectronicSchoolBoard®.

While we all know time is money, there’s also the savings in reducing paper and production costs as well. The savings will really add up if your team is still producing board packets and meeting materials the old-fashioned way.

### You are the IT lead...

What you want are fewer headaches. You’re the one who will get all of the questions, and the first one people come to when there is a problem. You want a reliable, secure system that does what it’s supposed to do, and does it well. Oh, and it needs to work with your existing systems and be easy to learn. We’ve got you covered.

ElectronicSchoolBoard® gives you exactly what you need – and we back it up with outstanding 24/7 support. You will never pay for an Upgrade – they are included!

Isn’t it great to have one less reason to reach for the aspirin?

*“ElectronicSchoolBoard® is easy to use and for someone who is responsible for training new board members and staff as they come aboard, this is critical. The learning curve is easy and straightforward... From a technical standpoint it is very easy to support. I can strongly recommend ElectronicSchoolBoard® as your paperless solution.”*

**Todd Pratt**

Richland School District Two - Columbia, South Carolina

Network Administrator

“ElectronicSchoolBoard has streamlined the process of creating the Board Book, which gets to the Board Members sooner, the District Staff keep it longer and the Public can view it over the Internet.

It has greatly improved communication between the Staff and the Board and between the school system and the Public.

It is saving us thousands on Staff time and printing costs alone.”

Jim Hite  
Director of Technology  
Prince William CS – VA

### Server Specifications: (Microsoft OS & DBs)

Pentium 2.0/3.0Ghz - 32/64 bit  
4-8GB RAM  
Disk Space - 100GB (15 yrs.)

SQL2000/2005/2008 Database  
IIS 6 or 7/2008  
128/256 SSL Certificate

## How will ElectronicSchoolBoard® make life easier in the Central Office?

**Customized to fit your needs.** We recognize that each district is unique, and we won't make you change the basic structure of your meetings to work with our system. We have the most built-in levels of customization available. And if there is something special you need, we'll help you get it done.

**A wide-range of pricing options.** We know budgets are tight for everyone, so we have made our system more affordable at every level. In fact, we can help you start making your meetings more efficient for as little as \$1,200 for an annual subscription. We also offer you the opportunity to purchase our software outright, which is a great long-term investment.

**To host or not to host?** We don't force you to host your information on our servers. Bring it In-house if you want. We are the only paperless meeting solution that offers you as many choices at all levels based on whether you subscribe or purchase.

**The security you need at every level.** At the most basic level, we keep the processes and information used by your staff and Board Members completely separate from what is automatically provided to your public web site. And internally, we allow you to give access to each function to those who need it – and not to those who don't.

**Transparency and security are not like oil and water.** With us, they do mix. We keep your systems secure, but also make it easy to publish information to your web site and include information in television broadcasts with ESB's AudienceDisplay.

**Software installation and system integration.** Technical support for installation and acceptance testing can be completed in two hours, and is included with your subscription. We offer Microsoft Active Directory integration and are fully compatible with all email systems, including Microsoft Outlook and Exchange.

**Training is fast and easy.** Because our system is clear and intuitive, role-based training will take as little as 2 hours for most of your central office staff and Board Members. We also provide “Train the Trainer” at no additional cost.

**Real support, whenever you need it.** We guarantee you will have friendly, expert technical support 24 hours a day, 7 days a week. Maintenance and all upgrades are included with your annual subscription – and if you buy, the most you will pay for our top product is \$4,500 annually and it includes all upgrades as well!

**Bringing your history and your future together.** Once installed, our system will automatically archive the meeting materials, agendas and minutes that are created for as long as you need. We also work with you to incorporate 10 to 20 years of all of your legacy agendas, items, minutes... along with currently applicable strategic goals and policies into the ESB libraries at no additional cost! You can search on everything!
